High quality, Diversified,
Single stage production solutions

Production Flexibility

Depend on neck size, machine can process bottle size from 10cc (8 cavities) to 2.5L (single cavity), which offers great production flexibility with various resin type such as PET, PET-G, TRITAN. Fulfilling all bottle requirements with just one machine.

Wide Product Range

Specially designed and developed for small volume diversified production and special bottle designs. Regardless of medicine bottles, cosmetic bottles, perfume bottles, detergent bottles, baby bottles, or special design bottles, this machine can fulfill all your production needs.

High Quality Assurance

In single stage process, preform injection and bottle blowing are done in one machine, as the neck is handled by the die

throughout the entire process and blow molding to ensure the preforms do not come into contact with other objects during transportation, thus producing finished products with glossy, complete, and untarnished appearances. Suitable for high-priced and high quality bottle production.

Innovative Design for Upgraded Quality

The standard hot runner for SS10 is industry standard thermal gate type; however hot runner with valve gate type is also available for higher preform gate finishing and wider processing window. An independent blow molding system and a smart temperature control system to ensure the improved quality of the finished products.

General Mold System

SS10 applies the general mold system, which is applicable

to one sectional mold of other brands so that its original mold could be directly connected. Launching SS10 could not only shorten the time for starting the production but also reduce the production cost.

Economic and Energy Saving Production Method

Without the need to outsource preforms or for additional capital investment in injection machinery purchase, single stage process provides advantages of lower operational cost and occupies less floor space (No need for preform storage). Since this process does not required secondary heating, with the help from servo driven injection system coupled with hybrid hydraulic system, CPSB-SS10 is able to save up to 40% in energy consumption while improving the overall output by 25%.

高質量，多樣化，一段式生產解決方案

產品適用範圍廣

多模腔選擇，最高可達 8 模腔，生產瓶型容積由 10c.c. (8 模腔) 至 2500c.c. (單模腔)，材質從 PET, PET-G, TRITAN 一機滿足各種瓶型需求。

滿足您對瓶型的渴望

專為少量多樣、特殊造型設計開發，不論是醫藥瓶、化妝瓶、香水瓶、清潔瓶、嬰兒奶瓶、特殊造型瓶等，一機就能完成生產。

一段式生產，高質量保證

射胚、吹瓶一機一站式完成生產，胚的牙口包覆於牙板中調溫、吹瓶，胚在輸送中不會與其他物件有接觸碰撞情形，成品外觀亮麗完整無刮痕，最適合高單價、高質量瓶型生產。

通用模具系統

SS10 採用了通用型的模具系統，亦可適用於其他品牌的一段式模具，可讓原本模具直接掛上 SS10 進行投產，不僅縮短投產時間，更能減少生產成本。

全新智能設計，質感再升級

新加入的射口殘料切除系統能將餘料切除，獨立的吹瓶系統、智能控溫系統的多樣設計，成品質感再升級。

經濟、節能的生產方式

免去購買瓶胚、另外添購射出機，減少設備成本也大幅省下廠房空間（場地和瓶胚存放空間）。免去二次加熱製程，新一代的伺服系統設計，更可省下高達 40% 的電力，而速度卻比上代機種快上 25%
