COMPANY PROFILE

Kang Chyau uses only the finest equipment and materials to ensure that all of our products will be of the highest quality. For example we use SKF ball bearings from Sweden for our main spindles and magnetic switches from Telemecanique of France. Each blow molding machine is equipped with an

electronic length counter and an accumulated time meter. In addition, all main output shafts are precision ground for exceptional stability and quiet operation. We are experienced producers of turn-key plants for plastic bag manufacturers, and our broad range of models and accessories can meet the needs of any customer.
